

Yeshwanth Toluva

DevOps & Cloud Engineer with AWS Certifications and hands-on experience designing, deploying, and automating scalable cloud-native solutions on AWS. Skilled in Infrastructure as Code (IaC), CI/CD pipelines, Linux system administration, and monitoring/logging. A self-starter and fast learner with a strong foundation in scripting, cloud security, and performance optimization. Eager to contribute to high-availability systems and collaborate in Agile, cross-functional teams.

WORK EXPERIENCE

Institute of Electronics

Vice President – Cloud Community Club

April 2022-April 2024

- Mentored 100+ students in AWS, DevOps, and Linux, improving hands-on cloud skills across the campus
- Organized workshops, technical events, and hands-on labs on cloud automation, infrastructure, and scripting
- Supported sponsorship and logistics, helping scale club activities to a larger audience

Assistant Lecturer

Assistant Lecturer

July 2023-May 2024

- Delivered lectures on AWS architecture, virtualization, and system administration in the absence of a faculty lead
- Created simplified, project-based content to teach core cloud computing concepts and tools
- Encouraged peer learning by mentoring students in real-world AWS deployments
- Delivered lectures on AWS architecture, virtualization, and system administration in the absence of a faculty lead
- Created simplified, project-based content to teach core cloud computing concepts and tools

EDUCATION

Keshav Memorial Institute of Technology

Bachelor of Technology in Computer Science

August 2024-May 2027

Government Institute Of Electronics

Diploma In Cloud Computing and Big Data

August 2021-May 2024

Technical Projects & Infrastructure Deployments

AWS Lightsail Deployment – CCC Website

- Provisioned and configured AWS Lightsail instances to host the club's WordPress-based website with a focus on high availability and secure access
- Set up custom domains, DNS routing (Route 53), and configured firewall rules to ensure fault-tolerant, publicly accessible infrastructure
- Automated SSL certificate management, nightly backups, and basic uptime monitoring, improving observability and reducing manual intervention
- Maintained consistent site performance and ensured near-zero downtime for user-facing services through lightweight resource tuning
- Applied DevOps best practices for deployment, hardening, and maintenance within a resource-constrained cloud environment

ScholarWatch

- Built a real-time availability monitor for a scholarship portal using Selenium, AWS Lambda, CloudWatch, and SNS
- Automated portal check every 12 hours using cron-like Lambda triggers; parsed response logs for status detection
- Logged outputs in DynamoDB and configured CloudWatch alarms to trigger incident alerts via SNS
- Applied fault detection patterns and error-handling for stability and resilience in production-like environments

DeepSync

- Built a focus-enhancing productivity app featuring Pomodoro timers, idle detection, soothing music, and dynamic website blocking to reduce distractions. Integrated motivational quotes, ritual reminders, and session tracking to promote deep work.
- Achieved a 30–40% improvement in study session productivity (based on self-tracking across 3 weeks). Used by peers for exam prep and hackathon sprints.

ArchMaster: Linux Automation & Ricing

- Custom Linux desktop automation suite integrating keyboard-driven workflows, dynamic theming, and system controls via scripts.
- Achieved a high-performance, minimal UI for productivity.

SKILLS

AWS (Core Services) ●●●●●

Linux System Admin ●●●●●

- Cloud & DevOps: AWS (EC2, Lambda, S3, CloudWatch, IAM, CloudFormation, Lightsail), Terraform, CI/CD (GitHub Actions), Serverless Framework, VPC, API Gateway, Load Balancing, DNS (Route 53), Cloud Security, IAM Policies
- Infrastructure & Automation: Linux (Arch, Fedora, Ubuntu), Bash scripting, Cron jobs, System provisioning, SSL automation, Infrastructure as Code (IaC), Configuration management (Puppet – learning), Service management (systemd), File servers (FTP, NFS, SAMBA), Web servers (Apache, Nginx)
- Monitoring & Reliability: AWS CloudWatch (Logs, Metrics, Alarms), SNS, Uptime monitoring, Fault detection, Incident management (ITIL basics), Log analysis, Postmortems, Real-time alerting, Escalation workflows, High availability, Observability, Performance tuning
- Programming & Tools: Python, Shell scripting, JavaScript (basic), REST APIs, Git, GitHub, JSON/YAML, Selenium (headless automation), CLI-based debugging, Log parsers
- Databases: DynamoDB, RDS (MySQL), SQL basics, Query optimization, Data modeling, Log storage for monitoring
- Web & Frontend: WordPress (admin + theme customization), HTML/CSS, Static hosting, DNS configuration, React (learning), Portfolio hosting (Vercel/Netlify)
- Docker + Containerization

SOFT SKILLS

- Problem Solving
- Attention to Detail
- Incident Communication
- Collaboration
- Analytical Thinking
- Ownership
- Process Adherence
- Time Management
- Curiosity to Learn
